

**Amendments to the Claims:**

Please amend claim 1 as follows:

1. (Amended) A discharge apparatus for disc bodies comprising;  
a fixed substrate;  
a disc spaced from said substrate a distance related to the thickness of said disc bodies, said disc including at least one opening having a diameter adapted to receive a disc body;  
*b2* means for rotating the disc to accent disc bodies in said opening and said space for discharge thereof, said rotating means including a shaft coupled between said disc and means for rotating the shaft for axial movement thereof and [said] adjusting means including an elevation body disposed about the shaft and at one end engaging the disc and at the other end including a plurality of axially extending projections and an operation body including a plurality of projections adapted to engage the projections on said elevation body, engagement of said projections displacing said disc to adjust said space.
